CONTENTS
VOLUME 17

NUMBER 1 — MARCH 1982

K. Heide, G. Völksch and P.W. Florenski:
Comparing Investigations on the Surface Structures of Irghizites
and Pyroclastics by SEM 1
M.J. Fitzgerald and A.L. Jacques: Tibooburra, a New Australian
Meteorite Find, and Other Carbonaceous Chondrites
of High Petrologic Grade 9
C.G.R. Reid and K. Fredriksson: The Madiun, Indonesia, Chondrite 27
Ian Halliday and Arthur A. Griffin: A Study of the Relative
Rates of Meteorite Falls on the Earth's Surface 31
Miscellanea 47

NUMBER 2 — JUNE 1982

H.J. Axon, E. Smith and F. Knowles: The Cracking History
of *Serrania de Varas*: An Alternate View 49
Hiroko Nagahara and Ikuo Kushiro: Calcium-Aluminium-Rich
Chondrules in the Unequilibrated Ordinary Chondrites 55
Edward R.D. Scott, G. Jeffrey Taylor and Pete Maggiore:
A New LL3 Chondrite, Allan Hills A79003, and
Observations on Matrices in Ordinary Chondrites 65
K. Fredriksson and G.S. Peretsman: Glanggang and
Selakopi: Two New Paired (?) Indonesian Chondrites 77
Abstracts of Papers Published in Meteoritika 87
The Meteoritical Bulletin 93
Meteoritical Bulletin Index 1957-1982 99
Miscellanea 117

NUMBER 3 — SEPTEMBER 1982

Peter J.J. Kamp and David J. Lowe: Geology and Terrestrial Age
of the Derrick Peak Meteorite Occurrence, Antarctica 119
Roy S. Clarke, Jr.: The Derrick Peak, Antarctica, Iron Meteorites 129
J.R. De Laeter: Two New Iron Meteorites From Western Australia 135
K. Fredriksson: The Manegaon Diogenite 141
Harold Povenmire: Distribution of Georgia Tektites 145
Steven B. Simon, J.J. Papike and M. Fuhrman:
Petrology of EETA79006 and Implications for the
Formation of Polymict Eucrites 149
P.B. Robertson, L.C. Coleman, E.J. Olsen and S.A. Kissin:
Canadian Arctic Meteorite Search: 1981 163

NUMBER 4 — DECEMBER 1982

Citation of the Award of the Leonard Medal of the Meteoritical Society 171
Acceptance of the Leondard Medal of the Meteoritical Society, 1982 175

Abstracts

F. Adar, L.D. Ashwal, M.T. Colucci, H. Belkin, E. Roedder, E.K. Gibson, D.J. Henry, R.K. Kotra and J.L. Warner, S.C. Bergman: A Progress Report on Fluid Inclusions in Meteorites 178
W.N. Agosto: Igneous Phosphorus Redox Reactions in Mesosiderite Silicates 178
A.A. Almohandis and R.S. Clarke, Jr.: The South Dahna, Saudi Arabia, Iron Meteorite 179
Edward Anders and Mitsuru Ebihara: Solar-System Abundances of the Elements: A New Table 180
H.A. Bartholomay and John W. Larimer: Dust-Gas Fractionation in the Early Solar System 180
C. Basu and J.N. Goswami: Nuclear Tracks in Refractory Silicate and Oxide Phases in CM Chondrites 181
R.H. Becker and R.O. Pepin: Solar Wind Noble Gases in the Washington County Iron Meteorite 182
A. Bischoff, D. Stoffler and K. Keil: Consolidation of Chondrite Regolith Breccias by Grain Boundary and Localized Shock-Melting 183
D.D. Bogard: Curation of the U.S. Antarctic Meteorite Collection 185
Donald Bogard: Trapped Noble Gases in the EETA79001 Shergottite 185
M. Bourot-Denise and P. Pellas: Cosmic Ray Track Densities and ^{60}Co Activities as Depth Monitors in Allende Meteoroid 186
J.P. Bradley, D.E. Brownlee and D.R. Veblen: Pyroxene Whiskers in CP Interplanetary Dust Particles: Evidence of Vapor Phase Growth 187
Cheryl Brigham, M.T. Murrell and D.S. Burnett: SiO_2-Rich Chondrules in Ordinary Chondrites 187
V.F. Buchwald: On the Use of Iron by the Eskimos of Greenland 188
P.Z. Budka: The Formation of Pallasitic Chondrules: Evidence for Rapid Solidification Under Microgravity Conditions 189
Peter R. Buseck and Jim Clark: The Zaisho Pallasite, a Bearer of Pyroxene and Phosphoran Olivine 189
M.W. Caffee, C.M. Hohenberg, M.M. Lindstrom, T.D. Swindle and B. Hudson: I-Xe Studies of Individual Allende Chondrules 190
M.W. Caffee, C.M. Hohenberg, T.D. Swindle and B. Hudson: Noble Gases in Graphite-Magnetite Inclusions 191
V.D. Chamberlain: Evidences of American Indian Awareness of Meteoritic Events: The Skidi Pawnee Case 192
C.R. Chapman, D.R. Davis and R. Greenberg: Apollo Asteroids: Relationships to Main-Belt Asteroids and Meteorites 193
J.H. Chen and G.J. Wasserburg: Isotopic Composition of Ag, Cd and Pb at Ultralow Levels in Iron Meteorites 194
C.-L. Chou: Comparison of Siderophile Element Fractionation in Terrestrial and Lunar Rocks 195
S.M. Cisowski: The Possible Relationship of the Brito-Arctic Tertiary Igneous Province (Batip) to the Cretaceous Terminal Event 196
U.S. Clanton, J.L. Gooding and D.P. Blanchard: NASA Cosmic Dust Program: A Source of Extraterrestrial Material for Research 197
R.N. Clayton, T.K. Mayeda and J. Olsen: Oxygen Isotopes in Ordinary Chondrites: What is the Origin of the Iron Groups? 198
R.E. Cohen: Classification, Mineral Chemistry, and Modal Analysis of Chondrules in the Mokoia C3(V) Carbonaceous Chondrite 199
J.R. Cronin, S. Pizzarello, G.U. Yuen, J.S. Frye and S. Chang: ^{13}C NMR Spectroscopy of the Insoluble Carbon of Carbonaceous Chondrites 200
J. Czajkowski, J.R. Arnold and J.G. Ogg: Cosmic Spherules from the Jurassic Period, Electron Microprobe Study 201
J. Danon, I. Souza Azevedo and R.B. Scorzelli: Ordered FeNi, Tetrataenite and Shock Effects in Chondrites 202

Wang Daode, Gregory W. Kallemeyn and John T. Wasson:
Compositional Study of 19 L and LL Chondrites 202
Andrew M. Davis: Phosphorus in Main Group Pallasites 203
Jeremy S. Delaney, M. Prinz and C.E. Nehru: Partial Melt Genesis
for Glassy Clasts in Basaltic Achondrites 204
Bertram Donn and Joseph A. Nuth: On the Formation and
Properties of Primordial Condensates 206
R.G. Downing and O.K. Manuel: Isotope Ratios in Canyon Diablo Iron 206
Gerlind Dreibus and H. Wänke: Parent Body of the SNC-Meteorites:
Chemistry, Size and Formation 207
M. Dziczkaniec, G.R. Lumpkin, G. Yuen and S. Chang: Structure and
Noble Gas Contents of Polyvinylidene Chloride 208
M. Dziczkaniec, G.R. Lumpkin, G.E. Lux and B. Srinivasan:
Physical Separates from the Murchison Meteorite 209
Bruce Fegley: Chemical Fractionations in Enstatite Chondrites 210
E.L. Fireman: Carbon-14 Ages of Antarctic Meteorites 212
G.J. Flynn: Limits of Spontaneous Fission Activity in Allende Acid Insoluble Residues 213
S. Fourcade and R.N. Clayton: Nitrogen Isotopes in the Apollo 16 Deep Drill Core 213
P. Fraundorf: Stratospheric Collections as a Probe of the Micrometeorite Flux 214
K. Fredriksson, Ph. Brenner, C. King-Frazier and S. Specht: Rapid Bulk
Analysis of Small Samples of Stony Meteorites, Rocks and Minerals 215
Urs Frick, T.W. Kenny and R.O. Pepin: The Irradiation History of Lunar Breccia 79035 ... 216
Urs Frick and R.O. Pepin: Anomalous Noble Gases and Nitrogen
in Allende Carbonaceous Matter 217
R.F. Fudali, W.A. Cassidy, Ghislaine Crozaz, Ursula Marvin and John Schutt:
Results of the 1981-82 Ansmet 218
T. Fukuoka and K. Ikeda: Rare Earth and Siderophile Elements
in Components of the ALH-765 and -77302 Polymict Eucrites 219
M.J. Gaffey: Surface Materials Heterogeneity on (4) Vesta and
Implications for the Origin of the Basaltic Achondrites 219
E.K. Gibson, Jr. and R.K. Kotra: Organic Chemistry, Carbon and Sulfur Abundances
of Antarctic Meteorites: Implications for Post-Fall History 220
B.P. Glass: Nickel-Iron Octahedral Crystals in North American Microtektites 221
J.L. Gooding and T. Fukuoka: Rare-Earth Element Abundances
in Chondrules from Unequilibrated Chondrites 222
J.N. Goswami and K. Nishiizumi: Cosmogenic Records
in Gas-Rich Chondrites and Achondrites 223
M.M. Grady, P.K. Swart and C.T. Pillinger: Carbon Isotopes
in Graphite from Graphite-Magnetite Matrix 223
Jeffrey N. Grossman: Lithophile Components of Chondrules
from the Semarkona Chondrite 224
L. Grossman, I. Kawabe, V. Ekambaram and E.A. King: Chemical Studies
of Evaporation Residues Produced in a Solar Furnace 226
Theresa A. Harriott and Roger H. Hewins: Cluster and Factor Analysis
of Diogenite Pyroxene Data 227
Jack B. Hartung: A Preliminary View of the Southern Gulf
of St. Lawrence as an Impact Structure 228
U. Herpers, R. Sarafin, L. Schultz and H.W. Weber: Depth Profiles of
Spallogenic 26-Al, 53-Mn, and Noble Gas Isotopes in Allan Hills 78084 228
R.M. Housely and E.H. Cirlin: Nepheline and Sodalite
in Allende Chondrules and Matrix 229
Glenn I Huss: Sorting Out the Many Falls of the Tulia-Dimmitt Area 229
Ian D. Hutcheon: The Mg Isotopic Composition of Igneous-Textured
Refractory Inclusions from C3 Meteorites 230
R. Hutchison: Low-Ca Pyroxenes and the Thermal History
of Unshocked L-Group Chondrites 231
Elmar K. Jessberger: On the Anomalously High Age in an Allende Inclusion 232

John H. Jones and Michael J. Drake: Experimental Geochemical Investigations of Magmatic Iron Meteorites: Modeling Complexities 233
Gregory W. Kallemeyn: Elemental Fractionations Among CV Chondrites 234
I. Kaneoka: ^{40}Ar-^{39}Ar Ages of Antarctic Meteorites and the Effect of Weathering on Their Ages 234
John F. Kerridge: Nitrogen Isotope Systematics in Meteorites 235
K. Kordesh, R. Blakely, A. Basu and J. Pachut: Fourier Grain Shape Analysis of Clasts in Achondrites 236
Alan S. Kornacki: The Origin of Inclusion and Meteorite Matrix in the Allende C3(V) Chondrite 236
Randy L. Korotev: Geochemical and Petrographic Study of Individual 1-2 mm Particles from Two Apollo 16 Soils 237
R.K. Kotra: Organic Compounds in Three Antarctic Meteorites 238
Alfred Kracher, Klaus Keil and Edward R.D. Scott: Leoville (CV3) — An "Accretionary Breccia"? 239
Frank T. Kyte and Kaare L. Rasmussen: Sanidine Spherules in a Pacific KT Boundary 239
P. Lambert: Rochechouart: A Flag Crater from a Clustered Impact 240
P. Lambert: Shock Experiments in Pyroxenes, and Some of Their Alteration Products 241
M.A. Lange, T.J. Ahrens and P. Lambert: Shock-Induced Dehydration and Implications for Carbonaceous Meteorites 242
C.A. Leitch, J.V. Smith, M.R. Smith and R.A. Schmitt: Microscopic Properties and Bulk Chemistry of Individual Chondrules of the Indarch Enstatite Chondrite 243
Roy S. Lewis: Unpaired Electrons: An Association with Trapped Primordial Gases in Meteorites? 244
Ian D.R. Mackinnon, David S. McKay, GeorgeAnn Nace and Andrew M. Isaacs: Al-Prime Particles in the Cosmic Dust Collection: Debris or Not Debris? 245
G.J. MacPherson and L. Grossman: Fine-Grained Spinel-Rich and Hibonite-Rich Allende Inclusions 245
D.J. Malvin and J.T. Wasson: A Multielement Study of Ungrouped Iron Meteorites Having Ge Contents Between 20 and 70 μg/g 246
G. Manhes, C.J. Allègre and A. Provost: U-Pb Systematics in Achondrites: Chronology and Inferences on the Bombardment History of Their Parent Body(ies) ... 247
K. Marti: Isotopic Evidence for Distinct Solar-Type Noble Gas Components in Enstatite Achondrites 248
Ursula B. Marvin: The Meteorite Fall at Ensisheim, 1492: Some Contemporary Views 249
Y. Matsumoto and Y. Miura: Statistical Treatment of Classification in Yamato-75 Chondritic Meteorites 249
L.A. McFadden: The Mineralogical Relationship of Meteorite Types to Near-Earth Asteroids as Determined from Reflectance Spectroscopy 250
S.G. McKinley, K. Keil and E.R.D. Scott: Allan Hills A77156, an EH4 Enstatite Chondrite: Some Evidence Against Formation from Red and Blue Luminescing Planetesimals ... 251
N.J. McNaughton, R.W. Hinton, C.T. Pillinger and A.E. Fallick: D/H Ratios of Some Ordinary and Carbonaceous Chondrites 252
Harry Y. McSween, Jr. and Robert E. Grimm: Shergottite Parent Body Controversy: The Gravity of the Situation 252
Y. Miura: Formation Conditions and Processes of Plagioclase in Meteorites 253
M. Miyamoto, H. Takeda and T. Ohta: 'Polymict Chondrite' as Inferred from a Polymict Eucrite Genesis 254
P. Mold, R.K. Bull and S.A. Durrani: Annealing Studies in Meteoritic Phosphates 255
Carol Molini-Velsko, Toshiko K. Mayeda and Robert N. Clayton: Silicon Isotopes: Experimental Vapor Fractionation and Tektites 255
C.B. Moore, C.F. Lewis and J. Clark: The Penwell Meteorite Revisited 256
M.T. Murrell and D.S. Burnett: Extreme Pu-U and Possible Pu-REE Fractionation in Unequilibrated Chondrites 256
N. Nakamura, H. Komi and H. Kagami: Rb-Sr Isotopic and REE Abundances in the Chassigny Meteorite 257

C. Narayan and J.I. Goldstein: Experimental Study of Widmanstätten Precipitation in Fe-Ni-P Alloys — Implications on Meteorite Cooling Rates 258
Horton E. Newsom and Michael J. Drake: Geochemical Arguments Against an Origin of the Moon by Fission from the Earth 259
K. Nishiizumi, J.R. Arnold, J. Klein and R. Middleton: ^{10}Be and Other Radionuclides in Antarctic Meteorites and in Associated Ice 260
K. Nishiizumi, M. Imamura, N. Takaoka and M. Honda: Cosmogenic Nuclides in Small Meteorites Recovered from the Antarctica 261
L. Nyquist, H. Wiesmann and J. Wooden: REE and Rb-Sr Systematics of Yamato Diogenite 74013 262
T. Ohta, H. Takeda, T. Nagata and K. Yanai: Ni-Rich Taenite in Extensively Recrystallized Yamato LL Chondrites 263
J.A. O'Keefe: Lunar Phenomena Reported by Gervase of Canterbury (1178 AD) 264
E. Olsen, I. Hutcheon, A. Davis and T. Mayeda: Xenolithic Clast in Murchison: A New Type of Carbonaceous Chondrite 264
Carol O'Neill and Jeremy S. Delaney: Zoning of Eucritic Feldspars 265
U. Ott, F. Begemann and H.P. Löhr: Diamond-Bearing Iron Meteorite ALHA 77287: Implications from Noble Gases 266
M. Ozima and S. Zashu: Primitive He in Some Diamonds 266
H. Palme, B. Spettel and F. Wlotzka: Fractionation of Refractory Metals in Ca, Al-Rich Inclusions from Carbonaceous Chondrites 267
P. Pellas and M. Bourot-Denise: Complex Irradiation History of Jilin Object: The Cosmic Ray Track Approach 268
R.O. Pepin and R.H. Becker: Nitrogen Isotopes in Iron Meteorites 269
Martin Prinz, C.E. Nehru, J.S. Delaney and M.K. Weisberg: The Kendall Co. Iron with Silicate Inclusions: Relationship with Silicates in IAB Irons 269
G.M. Raisbeck, F. Yiou, J. Klein, R. Middleton and K. Yamakoshi: Measurement of ^{26}Al and ^{10}Be in Extraterrestrial Matter by Accelerator Mass Spectrometry 270
